

Mirtha Carolina.

AI-of-1.

A cinematic real estate platform for the bilingual luxury market — built in eighteen days.

CLIENT	Mirtha Carolina Solorzano · Christie's International Real Estate Group
MARKET	Monmouth County, New Jersey · twenty-two submarkets
LIVE	mirthacarolina.com

01

EXECUTIVE SUMMARY

A platform that did not exist three weeks ago.

A single bilingual Realtor-Associate wanted a personal-brand website that could compete with — and differentiate against — Compass, Sotheby's, and The Agency. Not a template. A 1-of-1 editorial platform with cinematic video, bilingual parity, a live MLS feed, a branded AI voice concierge, and a 22-neighborhood content library.

We delivered **45 content pages** across a multi-page cinematic architecture, a custom AI voice agent that can drive the site in English or Spanish, and a full production brand identity — in **under three weeks**.

The equivalent scope at a traditional creative agency runs four to six months and carries a six-figure invoice at the low end. The work that follows documents exactly what was built, how it was built, and what it would have cost anywhere else.

TRADITIONAL AGENCY RANGE

\$348,000 – \$855,500

VIOX AI CINEMATIC DESIGN STUDIO

A fraction. *Eighteen days.*

Mirtha Carolina Solorzano.

Bilingual Realtor-Associate. Christie's International Real Estate Group. Teresa Minnick Group — a team with eight hundred million in career sales.

Based in Holmdel, New Jersey, Mirtha represents luxury listings across all twenty-two submarkets of Monmouth County — from Rumson old-money estates to Pier Village oceanfront condos to Keyport commercial revivals.

Her core differentiator in the market:

— **Editorial-grade bilingual representation**

Not a Google-Translate widget, but a fully translated experience with hand-tuned editorial Spanish.

— **Christie's International network access**

The only global real estate firm owned by an art auction house.

— **Background in international diplomacy, education, and marketing**

Rare among competitors in the Monmouth luxury segment.

The problem: none of this was visible online. Her only web footprint was a templated Christie's agent profile and a thin Teresa Minnick Group team page. No personal domain. No SEO presence. No lead capture. No bilingual content. No visual brand.

NJ REALTOR LICENSE • #1755940

Six goals. *One mandate.*

Target: agency-level quality — without the agency timeline or agency invoice.

01

Position at the top.

Position Mirtha at the top of the Monmouth County luxury market against incumbents with decades of local presence.

02

Capture the bilingual buyer.

Capture the bilingual Latin American buyer segment moving capital to the Jersey Shore — with zero top-producing Spanish-speaking options in the \$1M+ range.

03

Support active inventory.

Support her active listing inventory — eight properties across five property-type categories — with editorial-grade showcase pages.

04

Educate the buyer.

Educate prospective buyers about Monmouth County's twenty-two distinct submarkets so she becomes the definitive local authority.

05

Convert.

Convert. Private-showing inquiries — not a generic "contact me" form.

06

Scale.

Scale. New listings, new neighborhoods, new languages should add in minutes, not weeks.

Complete scope — *the full inventory.*

Forty-five indexable content pages across a multi-page cinematic architecture. Thirty-eight production images. A bilingual AI voice concierge with seven client tools. Full Schema.org graph. A brand identity system built to print.

Page Inventory

Forty-five content pages, four infrastructure files — built, indexed, and deployed.

CATEGORY	PAGES	WHAT'S ON EACH
Landing	01	Scroll-scrubbed drone hero (121 video frames) · 4-card featured listings teaser · bilingual bio teaser · Christie's + TCM affiliation lockup · Monmouth County map · newsletter signup.
About	01	Full editorial bio with real portrait · 3-chapter split-scroll story · 6-step process · client testimonial marquee · cross-links.
Listings	01 + 08	Atlantic Club Residences · The Seashore at Long Branch · The Willow at Long Branch · 30 Melrose at Lofts at Pier Village · 114 Wellington · 55 Lower Main · 537 S Atlantic · 522 Amboy.
Portfolio	01 + 04	Live FlexMLS embeds per category — Rentals, Residential, Luxury Residential, Commercial.

CATEGORY	PAGES	WHAT'S ON EACH
Neighborhoods	01 + 22	Twenty-two Monmouth County submarkets — each with 3-paragraph editorial overview (bilingual), 4-stat grid, 8 lifestyle pillars, cross-linked to other neighborhoods and relevant listings.
Insights	01	Q2 2026 Monmouth luxury market report with article placeholders for ongoing content.
Contact	01	Private Showing inquiry form with listing-reference auto-populate · 4-column contact block · magnetic CTA.
Legal / Infra	04	Bilingual custom 404 · 41-URL sitemap with hreflang + image entries · AI crawler policy · team transparency signal (humans.txt).
Total — indexable content		45 pages + 4 infrastructure files

SIGNATURE MOMENT

The cinematic hero. *Piloted by the scroll.*

A custom drone sequence — slow boom-out from a Navesink River waterfront estate at golden twilight. Generated, animated, and scroll-scrubbed. The user does not watch the film. They fly it.

WHAT IT IS

A canvas-rendered drone film.

A four-beat sequence that reveals Monmouth as the user moves through the page — cedar gable, aerial, golden-hour shift, skyline lock with CTA fade.

HOW IT WORKS

Frames tied to scroll position.

GSAP ScrollTrigger drives a canvas that paints the correct frame for every scroll offset. Frame 1 is preloaded for instant paint. Reduced-motion is honored.

THE STACK

Gemini → Kling → ffmpeg → GSAP.

Gemini 3.1 Flash generates the 2K still. WaveSpeed Kling v3 Pro animates to 5s video. ffmpeg extracts 121 frames. GSAP paints them on scroll.

gemini-3.1-flash · kling-v3-pro · ffmpeg · gsap-scrolltrigger

THE BILINGUAL CONCIERGE

Jessica. *She drives the site.*

Trained on a custom knowledge base with Mirtha's full bio, all eight listings, all twenty-two neighborhoods, and Christie's affiliation details. Auto-detects Spanish the moment a caller speaks it and flips the entire experience.

01

`scroll_to_section`

Jumps to any section on demand.

02

`scroll_direction`

Top · bottom · next · previous.

03

`change_language`

Flips EN ↔ ES and follows the caller there.

04

`highlight_property`

Pulses a featured trophy card.

05

`highlight_neighborhood`

Navigates any of 22 neighborhood pages.

06

`open_inquiry_form`

Scrolls to and focuses the contact form.

07

`show_market_report`

Surfaces the Q2 insights card.

A system built to print. *And to scale.*

Palette, typography, and a custom Editorial Monogram logo — produced in four production variants, wired through nav, footer, favicon, trust bar, and social share cards across all forty-five pages.

SHORE · SAND

FOIL · CHAMPAGNE

PRODUCTION

Thirty-eight production images. *Zero stock.*

One hero still, 121 hero frames, one real editorial portrait, twenty-two neighborhood heroes, and fifteen property and brand photos — every asset descriptively alt-texted with city, subject, and context.

SIXTEEN OF **THIRTY-EIGHT** PRODUCTION IMAGES SHOWN · FULL LIBRARY ACROSS ALL FORTY-FIVE PAGES

STRUCTURED DATA

A full Schema.org graph. *Fifteen schema types.*

Not a token JSON-LD block. A cross-referenced graph where every entity — agent, listing, place, breadcrumb — points to the others with named relationships.

TECHNICAL HARDENING

SEO · Accessibility · Core Web Vitals.

Everything Google rewards and every audit score — built into the template layer, not bolted on at the end.

✓ **Bilingual parity**1,700+ paired data-en / data-es attributes across the site — editorial Spanish, hand-tuned, not machine-translated.

✓ **Hreflangen** + es + x-default declared on every page.

✓ **Open Graph + Twitter** Per-page cards with 1200×630 imagery and Twitter handle linked.

✓ **Sitemap.xml** 41 URLs · hreflang xhtml:link · image:image with captions.

✓ **Custom 404** Bilingual, with noindex for crawl hygiene.

✓ **Core Web Vitals** Explicit width/height on every image, below-fold lazy-loading, CLS prevented.

✓ **Canonical URLs** Declared on all 45 pages to suppress duplicate-content risk.

✓ **Robots.txt** Sitemap pointer and explicit AI crawler policy.

✓ **Resource hints** preload hero frame 1 · dns-prefetch · preconnect Google Fonts.

✓ **Accessibility** ARIA on 30+ decorative divs, semantic HTML landmarks, reduced-motion honored.

Eleven phases. *Eighteen days.*

From Day 1 competitive intelligence through Day 18 handoff documents — sequenced in parallel where quality allowed, serial where it did not.

DAY 1

00

Competitive Intelligence.

Twenty competitors researched across four categories — direct Monmouth County, aspirational national, experience/brokerage, luxury lifestyle. Five niche opportunities and five design trends no local competitor was running. Key finding: no Monmouth County luxury realtor ran scroll-driven cinematic video, a genuine /es locale, or per-listing microsites.

DAY 1-2

01

Brand Analysis.

Complete brand system — palette, typography, logo direction, positioning. "Heritage Atlantic Broker. Modern Cinematic Eye." locked as the positioning line.

DAY 2

02

Hero Concept.

Storyboarded the four-beat scroll-scrubbed drone sequence: cedar gable, Navesink aerial, golden-hour chromatic shift, Monmouth skyline lock with CTA fade-in.

DAY 2-3

03

Scene Generation.

Gemini 3.1 Flash → 2K hero still. WaveSpeed Kling v3 Pro → five-second cinematic video. ffmpeg → 121 frames at 24fps.

DAY 3-7

04

Site Build.

Initial site built as a single-page monolith, then refactored into multi-page architecture with shared CSS, JS, and partials. Progressive enhancement from minimal to 45-page system across four deployment waves.

DAY 3-10

05

Image Production.

Thirty-eight images total — twenty-two neighborhood heroes in Architectural Digest editorial style, sixteen property and brand photos mixing real listings from brokerage sites, Spark Platform CDN, and Gemini synthesis.

DAY 8-10

06

SEO + Schema.

Comprehensive on-page audit and Schema.org graph expansion touching all forty-five pages. Sitemap, robots, hreflang, OG, Twitter, dns-prefetch, resource hints, ARIA, semantic HTML.

DAY 10-11

07

Deploy + Integrate.

GitHub repo → Vercel → custom domain pipeline. ElevenLabs agent creation with bilingual knowledge base and seven client tools. FlexMLS iframe integration per portfolio category.

DAY 12-14

08

Brand Integration.

Editorial Monogram → four production variants. Logo wired through nav, footer, favicon, trust bar, and social share cards. Christie's International Real Estate and Teresa Minnick Group official logos integrated.

DAY 15-18

09

Expansion.

Neighborhood system expanded from four to twenty-two. Cross-links retrofitted. Content corrections (license number, 30 Melrose → Lofts at Pier Village, Long Branch rename).

DAY 18

10

Handoff Documents.

Competitive report, proposal, brand system export, Google Business Profile checklist, broker authorization email drafts, case study — all saved as persistent deliverables Mirtha owns.

Twelve layers. *No framework bloat.*

Every technology choice had to justify itself against three criteria: loads instantly, Mirtha owns it, and it scales without a rebuild.

LAYER	TECHNOLOGY	WHY
Frontend	vanilla html5 · css3 · modern es	No framework bloat. Loads instantly.
Animation	gsap 3.12.5 + scrolltrigger	Industry-standard for cinematic scroll work.
Typography	google fonts · fraunces · inter · cormorant · jetbrains mono	Free, performant, Christie's-aligned.
Hero video	gemini-3.1-flash → kling-v3-pro → ffmpeg	AI-accelerated production, drone-film quality.
Images	gemini-3.1-flash (editorial realism)	10× faster and cheaper than staged photo shoots.
Logo	gemini-nano-banana + python pil	Custom mark in 60 seconds, four variants in five minutes.
Voice agent	elevenlabs conversational ai + custom kb	Best-in-class multilingual voice, seven custom client tools.

LAYER	TECHNOLOGY	WHY
MLS data	<code>flexmls public share iframe</code> (<code>spark api-ready</code>)	No lock-in, works immediately, zero auth required.
Hosting	<code>vercel production</code>	Instant global CDN, free SSL, auto-deploy from GitHub.
Version control	<code>github</code>	Industry standard, auto-deploy pipeline, audit trail.
Domain	<code>cloudflare dns + vercel</code>	Customer keeps registrar control.
SEO	<code>schema.org json-ld + hreflang + sitemap.xml</code>	W3C-compliant, Google-recommended.

What this platform unlocks.

Next 90 days. *Commercial.*

— Greenfield SEO positioning.

No legacy to unwind. Google indexes all 45 pages within ~2 weeks of sitemap submission. Expected ranking for "bilingual realtor Monmouth County," "Spanish speaking realtor New Jersey," "Christie's Monmouth," and 22 neighborhood long-tails.

— Voice Concierge lead capture.

Every visitor gets a 24/7 bilingual docent. Expected conversion lift vs. a static form: 3 to 5x.

— Listing-support SEO.

Every active listing has a dedicated editorial page. Listing URLs become shareable assets.

— Neighborhood authority.

Twenty-two neighborhood pages position her as the encyclopedic local guide.

— Bilingual differentiation.

Zero other Monmouth County luxury realtors have an editorial-grade /es experience. Immediate capture of the Latin American international buyer segment.

Long-term. *Structural.*

- **Listings plug in as 120 lines of HTML + 1 image.**

The template is now a known quantity.

- **Neighborhoods plug in as 320 lines of HTML + 1 image.**

Template exists; content is the only variable.

- **New languages plug in as attributes.**

data-en, data-es, data-fr, data-it — the system is language-agnostic.

- **Spark API slot is already wired.**

The moment Teresa Minnick's broker authorization lands, the portfolio upgrades from iframe to native IDX with one paste.

- **Google Business Profile playbook complete.**

Mirtha can have GBP live in 30 minutes from the checklist we delivered.

Greenfield SEO positioning. Zero legacy to unwind.

What other firms would charge.

At the quality and scope VioX AI delivered to Mirtha, here is what a traditional creative agency in New York or San Francisco would invoice. Each line item reflects published rates at boutique and major US creative agencies, 2025-2026.

Eight load-bearing decisions.

This is not a template. It is not a theme. It is not configurable by a non-technical user — and that is the point. Every decision was load-bearing.

01 The Navesink drone hero.

Not stock footage. A custom scene generated specifically to match Mirtha's geographic specialty.

02 Twenty-two hand-tuned narratives.

Neighborhood pages are not auto-generated. Each is editorially calibrated to the town it describes.

03 Editorial Spanish.

Hand-drafted. Not machine-translated. The tone shifts when Spanish readers arrive.

04 Heritage Atlantic Broker. Modern Cinematic Eye.

The positioning came out of a specific competitive finding — not a brainstorm.

05 Christie's Red used surgically.

Exactly three moments per page — affiliate lockup, hover underline, a single stat. Never decoratively.

06 Champagne Gold rules instead of shadows.

An intentional anti-SaaS decision. Rules where a template would reach for drop shadows.

07 **Magnetic cursor on "Private Showing."**

A cursor-follow specific to the editorial-luxury voice. Not a generic hover state.

08 **Seven voice-agent tools.**

Jessica does not answer questions. She gives guided tours.

*A template site has no soul. A cinematic design-studio build has a
specific one.*

What Mirtha controls. *Long-term.*

No vendor lock. No hostage keys. No subscription floor. Every asset, every account, every repository — in her name.

GitHub repository

Full source ownership — github.com/juan-viox/mirthacarolina-com.

Vercel deployment

Zero lock-in. Instant rollbacks. Auto-deploy on push.

Custom domain

Stays with her registrar. Portable to any host.

ElevenLabs voice agent

Her account. Her knowledge base. Her voice preferences.

FlexMLS share

No third-party auth required. Portfolio upgradeable to Spark API when authorization lands.

Brand assets

Logo in 4 variants, color swatches, typography, design system JSON.

Deliverable documents

Competitive report, proposal, brand system, GBP checklist, case study, email drafts.

Nothing VioX-owned. Nothing vendor-locked.

CLOSING STATEMENT

For the price of a single New York agency's discovery phase, Mirtha Carolina now has an agency-level cinematic website, bilingual parity across forty-five pages, a branded AI voice concierge, a twenty-two-neighborhood content library, and a deployment pipeline that scales.

In eighteen days.
